

# LOGI INTERNAL SYSTEMS STIC

DC Roller Drive

# Pallet Dispenser

## Product Description

A pallet dispenser is a machine that loads and dispenses pallets that are used in warehouses, packing operations, or facility processes. The machine stacks pallets manually and dispenses pallets at ground level. Our **pallet dispenser** stacking machines completely eliminate the use of manual or lifting pallets by hand. Industrial pallet stacking machines from IMPEL will improve the safety of your operation by reducing exposure to injury. Our pallet dispenser is able to dispense a wide range of pallets like CHEP, wood, plastic, etc.

# Pallet Dispenser

## Technical Specification

Features	In-line Auto Loading
	Automatic Self Centering
	Load Pallets Long or Short Edge Leading
	Unattended Operation with Stack Light Alert
	Discharge in any Direction
	PLC Programming
	Compact Design for Small Spaces
	Electric/pneumatic Lift System
Capacity	Safety Guarding and Controls
	15 to 25 pallet
Optional	Chain Conveyors
